K-LED LASH

THE NEW
TECHNOLOGY IN
KOREAN EYELASH EXTENSION WORLD

WHAT IS K-LED LASH ?

K-LED LASH is a new Korean Eyelash Extensions technique using special adhesive that cures completely in 2 seconds when LED light of a specific wavelength hits it.

After total cure in 2 seconds, no more worry about sticking to the lashes around it. No need to dry with a fan or cure it over time after the procedure.

Longer Retention

Reduce Irritation & Allergic Reactions

405_{nm}
safe wavelength
Not UV or Infrared

YOUR JOURNEY TO
HEALTHY NAILS
STARTS HERE

Healthy Manicure Gel is designed to do more than just beautify your nails — it helps make them stronger over time. Our builder base formula adds a protective layer that reinforces the natural nail structure, reducing breakage, peeling, and thinning. By filling in weak spots and creating a smooth, even surface, the builder base allows nails to grow longer and healthier without feeling heavy or rigid. The result is nails feeling stronger, more resilient, and well-protected with every application.
